Research.

NEUROSCIENCES

## PREFACE

This brochure provides a first insight into research in Germany in the field of neurosciences and is especially recommended to early career researchers from abroad.

Neuroscience research in Germany is primarily conducted at universities but also at non-university research institutions. Almost all universities and many universities of applied sciences host a neuroscience research section. The spectrum ranges from small monothematic working groups to large interdisciplinary departments and covers a variety of topics from traditional areas to new explorative research fields.

This brochure is intended to give an initial overview. The following map and tables highlight research consortia and graduate training programmes at universities and non-university research institutes with a main focus on neurosciences.

On top of this, there is a lot more to discover: e.g. the DFG funds a multitude of individual projects in the area of neurosciences. These individual grants outweigh the research consortia both in number and in overall funding volume. Towards the end of this brochure, you will find a link to the online database GEPRIS that provides an overview of all DFG-funded research projects. You will also find additional important links for further information about profiles of German universities, research institutions and funding.

We invite you to explore the many opportunities that Germany has to offer and welcome your feedback.

# OVERVIEW

- Research Training Groups
  - International Research Training Groups
  - Integrated Research Training Groups in Clusters of Excellence
  - Integrated Research Training Groups in Collaborative Research Centres/Transregios
  - Clinical Research Units
  - Research Units
  - Clusters of Excellence
  - Collaborative Research Centres/Transregios
- Helmholtz Graduate Schools  
Leibniz Graduate Schools  
International Max Planck Research Schools  
Fraunhofer Institutes  
Helmholtz Centres  
Leibniz Institutes  
Max Planck Institutes  
Others

DFG-funded Priority Programmes and several Research Units are not shown on the map since they are not necessarily located at a single location; they are listed on pages 12, 13 and 17.  
The map shows the headquarters of the non-university research institutions.

# CENTRES OF RESEARCH

- FUNDED BY DFG -

**Clusters of Excellence (EXC)** promote cutting-edge research. They serve to strengthen the research profiles of universities or university consortia in internationally competitive fields. They create excellent training and career opportunities for early career researchers. Within the framework of the Excellence Strategy, they can receive between €3 million and €10 million annually and are funded for seven years, starting in 2019. A second seven-year period is possible.

**Collaborative Research Centres (CRC)** are organisational units established at universities which enable researchers to pursue an outstanding research programme crossing the boundaries of disciplines, institutes, departments and faculties. The traditional Collaborative Research Centre is generally applied for by one university and is conducted by researchers of that university. Early career support is a key objective of the Collaborative Research Centre Programme. Early career researchers may get involved in a CRC in numerous ways, for example within the framework of an Integrated Research Training Group. Collaborative Research Centres are funded for a period of up to 12 years.

**Transregios (TRR)** are Collaborative Research Centres in which up to three universities collaborate with each other and submit a joint application. The contributions of the cooperative partners are essential, complementary and synergistic to the joint research objective. Funding facilitates close, nationwide collaboration among the participating universities and researchers, as well as networking and shared use of resources. There is also the option of international Transregios.

# RESEARCH UNITS

-FUNDED BY DFG-

**Research Units (FOR)** often contribute to establishing new research directions. Research Units are made up of a team of researchers working together on a research project which is often of an interdisciplinary nature. Research Units consist of several researchers and subprojects. The subprojects of a Research Unit are often located at several locations throughout Germany. Research Units are generally funded for up to six years.

In case most of a Research Unit's subprojects are located at one place, it is represented in the map.

Title	Funded Since	Contact
Synapses under Stress: Early Events Induced by Metabolic Failure at Glutamatergic Synapses (FOR 2795)	2018	tba
Dissection of a Brain Circuit: Structure, Plasticity and Behavioral Function of the Drosophila Mushroom Body (FOR 2705)	2018	tba
Cognitive Theory for Tourette Syndrome – A Novel Perspective (FOR 2698) Subprojects mainly located in: Lübeck	2018	tba
Epileptogenesis of Genetic Epilepsies (FOR 2715)	2017	<a href="http://www.medizin.uni-tuebingen.de/en/Research/Collaborative+Research/Clinical+Research+Units/FOR+2715+%E2%80%93+Epileptogenesis+of+genetic+epilepsies.html">www.medizin.uni-tuebingen.de/en/Research/Collaborative+Research/Clinical+Research+Units/FOR+2715+%E2%80%93+Epileptogenesis+of+genetic+epilepsies.html</a>
Reduced Penetrance in Hereditary Movement Disorders: Elucidating Mechanisms of Endogenous Disease Protection (FOR 2488) Subprojects mainly located in: Lübeck	2016	<a href="http://gepris.dfg.de/gepris/projekt/287074911">http://gepris.dfg.de/gepris/projekt/287074911</a>
Plasticity versus Stability – Molecular Mechanisms of Synaptic Strength (FOR 2419) Subprojects mainly located in: Hamburg	2017	<a href="http://www.uke.de/kliniken-institute/zentren/zentrum-%C3%BCmolekulare-neurobiologie-(zmnh)/forschgruppe-for-2419.html">www.uke.de/kliniken-institute/zentren/zentrum-%C3%BCmolekulare-neurobiologie-(zmnh)/forschgruppe-for-2419.html</a>

## RESEARCH UNITS

Title	Funded Since	Contact
Interactions at the Neurovascular Interface (FOR 2325) Subprojects mainly located in: Münster	2015	<a href="https://campus.uni-muenster.de/en/for2325">https://campus.uni-muenster.de/en/for2325</a>
Active Perception (FOR 2293) Subprojects mainly located in: Munich	2015	<a href="http://www.for2293.uni-muenchen.de">www.for2293.uni-muenchen.de</a>
Calcium Homeostasis in Neuroinflammation and -degeneration: New Targets for Therapy of Multiple Sclerosis? (FOR 2289) Subprojects mainly located in: Heidelberg	2015	<a href="http://www.for2289.de">www.for2289.de</a>
Crossing the Borders: The Interplay of Language, Cognition, and the Brain in Early Human Development (FOR 2253)	2015	<a href="https://crossing-project.de">https://crossing-project.de</a>
(Lymph)Angiogenesis And Cellular Immunity in Inflammatory Diseases of the Eye (FOR 2240) Subprojects mainly located in: Cologne	2014	<a href="http://www.for2240.de">www.for2240.de</a>
Interneuron Synaptic Plasticity – From Mechanisms to Functions (FOR 2143) Subprojects mainly located in: Freiburg	2014	<a href="http://www.for2143.uni-freiburg.de">www.for2143.uni-freiburg.de</a>
Neurobiology of Affective Disorders: A Translational Perspective on Brain Structure and Function (FOR 2107)	2014	<a href="http://www.for2107.de">www.for2107.de</a>
The Physiology of Distributed Computing Underlying Higher Brain Functions in Non-Human Primates (FOR 1847)	2013	<a href="http://dfg-for-1847.dpz.eu">http://dfg-for-1847.dpz.eu</a>
Learning & Habituation as Predictors of the Development & Maintenance of Alcoholism (FOR 1617) Subprojects mainly located in: Berlin	2011	<a href="http://cegg.psych.tu-dresden.de/lead">https://cegg.psych.tu-dresden.de/lead</a>

## CLINICAL RESEARCH UNITS

-FUNDED BY DFG-

**Clinical Research Units (KFO)** provide outstanding researchers the opportunity to carry out close, medium-term cooperation in a special research project in the field of disease or patient-oriented clinical research. Clinical Research Units are usually located at one institution. As a rule, they receive funding for up to six years.

## CLINICAL RESEARCH UNITS

Location	Institution	Title	Funded Since	Contact
Göttingen	Georg-August-Universität Göttingen	Genotype-Phenotype Relationships of the Longitudinal Course of Psychosis (KFO 241)	2011	<a href="http://www.kfo241.de">www.kfo241.de</a>
Mannheim	Zentralinstitut für seelische Gesundheit	Mechanisms of Disturbed Emotion Processing in Borderline Personality Disorder (KFO 256)	2011	<a href="http://www.kfo256.de">www.kfo256.de</a>

## PRIORITY PROGRAMMES

- FUNDED BY DFG -

**Priority Programmes (SPP)** have a programmatic focus and the purpose of advancing knowledge in an emerging field of research through collaborative networked support. They are characterised by their enhanced quality of research through the use of new methods and forms of collaboration in emerging fields. As a rule, one programme can consist of up to 30 individual subprojects located at several institutions across Germany; it usually has one coordinating person. Priority Programmes normally receive funding for a period of up to six years.

Priority Programmes are not shown on the map. Only the titles of the overall themes and the project website are listed.

## PRIORITY PROGRAMMES

Title	Funded Since	Contact
Gene and Cell Based Therapies to Counteract Neuroretinal Degeneration (SPP 2127)	2018	tba
Computational Connectomics (SPP 2041)	2017	<a href="https://spp2041.de">https://spp2041.de</a>
Functional Specializations of Neuroglia as Critical Determinants of Brain Activity (SPP 1757)	2014	<a href="http://www.glia-network.de">www.glia-network.de</a>
Emerging Roles of Non-Coding RNAs in Nervous System Development, Plasticity and Disease (SPP 1738)	2014	<a href="http://www.spp1738.de">www.spp1738.de</a>
Resolving and Manipulating Neuronal Networks in the Mammalian Brain – From Correlative to Causal Analysis (SPP 1665)	2013	<a href="http://www.spp1665.de">www.spp1665.de</a>
Ultrafast and Temporally Precise Information Processing: Normal and Dysfunctional Hearing (SPP 1608)	2012	<a href="http://www.pp1608.com">www.pp1608.com</a>

# NON-UNIVERSITY RESEARCH INSTITUTIONS

**Fraunhofer Society** is one of the world's leading organisations for applied research with an annual research budget of 2.3 billion euros, 72 institutes and more than 25,000 employees. Fraunhofer's R&D portfolio covers a wide range of fields, including health, security, communications, transport, energy and the environment. [www.fraunhofer.de](http://www.fraunhofer.de)

**The Helmholtz Association** contributes to solving major challenges facing society, science and industry with world-level research in six areas: energy, earth and environment, health, key technologies, structure of matter and aeronautics, space and transport. With more than 39,100 employees in 18 research centres and an annual budget of approximately 4.5 billion euros, the Helmholtz Association is Germany's largest scientific organisation. [www.helmholtz.de](http://www.helmholtz.de)

**The Leibniz Association** is an umbrella organisation of 93 research institutes. The annual budget amounts to 1.93 billion euros. Some 9,800 researchers – approximately 20% of them from abroad – work on a widely diverse range of subjects, including the humanities and social sciences, economics, spatial and life sciences, mathematics, natural and engineering sciences and environmental research. [www.leibniz-association.eu](http://www.leibniz-association.eu)

**The Max Planck Society** for the Advancement of Science is one of Germany's largest independent non-profit research organisations. The Max Planck Society has been allocated approximately 1.8 billion euros for 2017. A combined total of 14,000 researchers, postdoctoral/junior researchers and visiting researchers at 84 Max Planck Institutes conduct basic research in the natural sciences, life sciences, social sciences and humanities. One third of the researchers and more than half of the junior and visiting researchers come from abroad. [www.mpg.de](http://www.mpg.de)

# GRADUATE TRAINING

- FUNDED BY DFG -

**Research Training Groups (RTG)** combine an ambitious research programme at universities with comprehensive training, tailored supervision and academic freedom to form an ideal environment for a successful doctorate. Research Training Groups can also have an interdisciplinary approach. They are funded for a period of up to nine years.

**International Research Training Groups (IRTG)** provide opportunities for joint doctoral training programmes between German universities and universities abroad. The research and study programmes are jointly developed and supervised. Doctoral students in the programme spend six months at the partner institution.

**Integrated Research Training Groups** (within Clusters of Excellence or Collaborative Research Centres/Transregios) offer ideal research environments for doctoral researchers. The main aim of these structured training programmes is to provide young scientists and academics with opportunities to independently carry out research at an early stage of their career. The programmes further take care to closely integrate early career researchers into an academic network. Working in Clusters of Excellence or Collaborative Research Centres projects, doctoral researchers achieve additional qualifications. As research assistants in these projects, they contribute to the Research Centre's success. They are closely involved with the projects and have access to the entire project infrastructure.

# GRADUATE TRAINING

## -AT NON-UNIVERSITY RESEARCH INSTITUTIONS-

**Helmholtz Graduate Schools** provide a roof under which a varied number of curricula in different fields, or across disciplines, can find a home. Helmholtz Graduate Schools constitute a valuable addition to the wide range of training programmes available within the Helmholtz Association. They offer optimal conditions for PhD students to work and enable them to create a network of contacts with fellow university researchers while also fostering the integration of participants into the research environment.

**Leibniz Graduate Schools** were established to foster the systematic promotion of junior researchers. Young researchers are given the opportunity to do their doctorates in an excellent, collaborative, cross-disciplinary research environment. To this end, Leibniz institutions cooperate closely with universities. As every Leibniz institution focuses on clearly defined, socially-relevant themes, doctoral candidates have a wealth of networking opportunities in a large, dedicated scientific community. The particular character of research at the institutions in the Leibniz Association, which includes fundamental, large-scale and application-oriented research, means doctoral candidates can conduct research from basic idea right through to application.

**International Max Planck Research Schools (IMPRS)** offer talented German and international junior scientists the opportunity to earn a doctorate under excellent research conditions. The research schools are established by one or several Max Planck Institutes. These IMPRS work in close cooperation with universities and other – sometimes international – research institutions. This provides an extraordinary framework for the graduate students to work in, and is a great advantage in interdisciplinary research projects, or in projects that require special equipment.
