Welcome to Germany! New “Plan your stay” section on our website for you!

Dear reader,

According to the latest Vision & Mission Statement, the German Academic Exchange Service (DAAD) is focusing on "being the world’s leading provider of research and scholarship programmes." Let us now take a look at some of these programmes.

Upcoming events

- "Vision & Mission Statement: Benefits of DAAD’s work and sustainable research topics in India" - 21. & 25.09.2023
- "Fellowships – Green Hydrogen" - 12.09.2023
- "Information session on ERA Fellowship" - 14.09.2023
- "Info Talks on DFG Funding" - 21.09.2023
- "Max Planck Schools" - 22.09.2023
- "Foundation for Freedom" - 23.09.2023
- "Hector Fellow Academy" - 24.09.2023
- "European Research Council" - 25.09.2023
- "University of Bayreuth Centre of International Excellence Grants Programme 2023" - 26.09.2023
- "Junior and Senior Fellowship Programme 2024 | Short Term" - 27.09.2023
- "Go to Grantfinder" - 28.09.2023
- "Go to European Research Council" - 29.09.2023
- "Go to Hector Fellow Academy" - 30.09.2023
- "Go to University of Bayreuth Centre of International Excellence Grants Programme 2023" - 31.09.2023

To make the process easier, Research in Germany has collected the most important information for international researchers planning a stay in Germany. Moving to a different country takes courage, time and preparation. If you're considering moving to Germany, you should consider the most useful websites that provide information about the German lifestyle, climate, weather, and so on. The website "www.research-in-germany.org" is a great resource for this purpose.

The tagline "stronger together: 50 European Universities alliances cooperate" indicates the importance of collaboration in research and education. Furthermore, there are 430 European universities that have already taken this message to heart and have joined the collaboration. This demonstrates the strong sense of unity among European institutions.

In case you're worried about the quality and international competitiveness of higher education in Germany, there is strength in numbers. More than 430 European universities have joined the collaboration, which is a testament to the quality and international competitiveness of higher education in Germany.

The true cost of climate change: weather and economics in one. The true cost of climate change is not just economic, but also environmental. The effects of climate change are evident in the form of extreme weather conditions; heat waves, droughts or rainstorms are becoming more frequent. The pace of climate change is accelerating, and there is no time to lose in the combat against climate change.

Germany takes action: a new climate law is setting the agenda. The new climate law aims to reduce greenhouse gas emissions and achieve net greenhouse neutrality by 2045 and even negative greenhouse neutrality by 2050. The law includes the reduction of greenhouse gas emissions in all sectors, including industry, transport, and agriculture.

The law has its foundation in the Paris Agreement target of limiting global warming to well below 2°C and possibly to 1.5°C. Among other measures, the climate law includes the reduction of greenhouse gas emissions in all sectors, including industry, transport, and agriculture.

The true cost of climate change: weather and economics in one. The true cost of climate change is not just economic, but also environmental. The effects of climate change are evident in the form of extreme weather conditions; heat waves, droughts or rainstorms are becoming more frequent. The pace of climate change is accelerating, and there is no time to lose in the combat against climate change.

In conclusion, the new climate law is a significant step towards achieving climate neutrality by 2045 and even negative greenhouse neutrality by 2050. It is important to note that the law has its foundation in the Paris Agreement target of limiting global warming to well below 2°C and possibly to 1.5°C. The law includes the reduction of greenhouse gas emissions in all sectors, including industry, transport, and agriculture.

There is no time to lose in the combat against climate change. The law has its foundation in the Paris Agreement target of limiting global warming to well below 2°C and possibly to 1.5°C. The law includes the reduction of greenhouse gas emissions in all sectors, including industry, transport, and agriculture.
