

Invitation

Joint innovation in digital healthcare has never been more imperative.

InnoHealth USA is a campaign led by the Fraunhofer-Gesellschaft as a constituent part of the "Research in Germany" initiative of the German Federal Ministry for Education and Research. Through this program, **nine selected German Research-SME-Tandems** with their innovative projects are **virtually traveling to Silicon Valley, Boston, and Atlanta/Houston** to network with esteemed research institutions, organizations and companies of the American digital healthcare sector. The goal is to promote joint German-American cooperation on innovative smart healthcare technologies.

We invite you to join us, Monday June 7th, for a virtual presenting event on the future of digital healthcare. The event will feature a speech from the German Embassy Washington and Fraunhofer USA, a professional panel and pitches from the visiting tandems. As a final part of the program, you will have the opportunity to network with the tandems - each composed of a researcher and an entrepreneur - in the virtual hallways.

When? Monday June 7th , 17:00 CEST | 11:00 am EST | 08:00 am PDT

How? To join the event, please register here:
<https://www.eventbrite.com/e/innohealth-usa-2021-tickets-153889444471>

Who? These **innovative tandems** are looking forward to meeting you:
www.research-in-germany.org/innohealth/participants/german-tandems-usa.html

This is an extraordinary opportunity to **connect with representatives from the U.S. and Germany**, and to **learn about technologies and solutions** in the fields of **AI-enabled healthcare, medical devices**, and **digitization** that are changing the future of healthcare.

We are looking forward to your participation as we delve into the current status and future opportunities of German American innovation!

Rebekka Freitag-Li
